Abstract: To build any nation to a desired standard education plays an important role. Education at any level includes three pillars viz. curriculum, evaluation and assessment process. The paper emphasis on the analysis of choice based credit system (CBCS) implemented by Shivaji University to its affiliated colleges of the science streams. The parent syllabus formulated by University Grants Commission (UGC), New Delhi was not implemented as such by the university. The critical analysis of not accepting the parent syllabus as such with subsidiary reasons is assigned in the paper. The retrospective effect of curriculum is judged by the evaluation process amongst student and teachers. The paper mentions modern evaluation processes other than the traditional methods which are suggested. Assessment refers to the wide variety of methods or tools that educators use to evaluate, measure, and document the academic readiness, learning progress, skill acquisition, or educational needs of students. An attempt has been made to describe the multiple assessment methods for science under graduate courses to implement the curriculum that relate the social and economic means of society.
