First Transition Series: As the last electron enters the **3d** orbital, first transition series is also called as **3d block** or **3d series**.

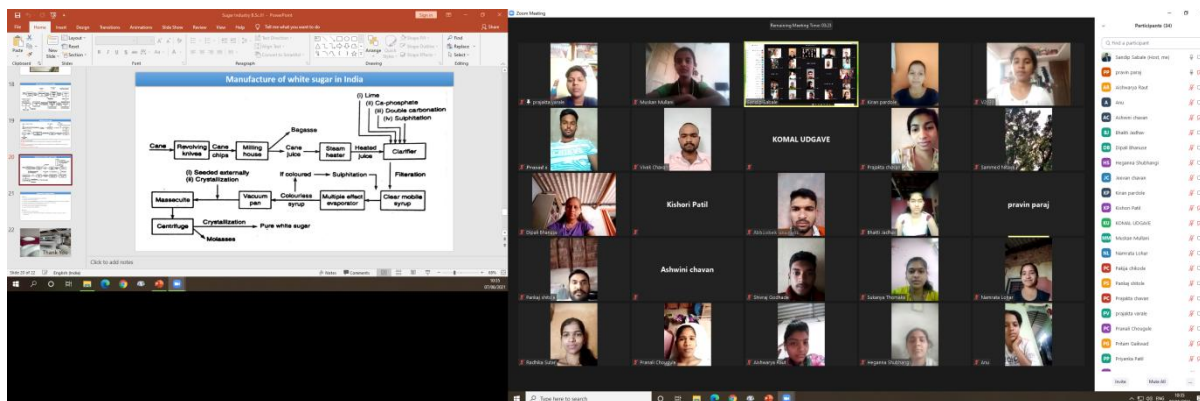

The elements scandium to zinc ($Z = 21$ to 30) are known as the **3d block of elements** because here the first of the possible d sub-shells is progressively filled (**3d-block** – first row of the d-blocks).

In this series there are ten elements included which are **Sc, Ti, V, Cr, Mn, Fe, Co, Ni, Cu, and Zn**. They always correspond to the filling of the 3d subshell.

The general electronic configuration of these elements can be written as
